

*Gasson Hall interiors, Boston College*

Boston College entrusted us with the interior renovation of Gasson Hall, the university's iconic building that stands at the center of the Chesnut Hill campus.

BC's objectives included the reconfiguration of office suites throughout the building (to meet current programmatic needs of users), the addition of virtually silent air conditioning to a large assembly hall (originally the "Irish Room"), upgrades to finishes and audio-visual systems at classrooms, student lounges and bathrooms. We also selected and specified furniture throughout.

The project also involved numerous changes to comply with building, accessibility, energy and plumbing codes.

*Completed 2011.*
